

The Cumulus is composed of a multitude of translucent leaves, each suspended individually, allowing for subtle animation when exposed to moving air and giving the light a soft, organic and layered depth.

Ideal in a variety of locations; over dining tables, in living rooms, in lobbies or foyers and stairwells, there is a model in the Cumulus series to fit your space, and if not, we will design a custom piece tailored precisely to your project.

With the addition of an open lattice canopy, many of the Cumulus lights can be suspended below a skylight without blocking the incoming light. This open drop canopy also assists with suspending on vaulted or sloping ceilings. Cumulus shape, size, colour and material are fully customisable.
