Myco

The Myco is designed as a modular branching system that can be scaled to meet the requirements of different spaces - from smaller branching forms to hang above an intimate dining room table, to an expansive network of branches that becomes a canopy of light in a living room, restaurant or public space.

Myco lights are made to order entirely by hand by experienced craftspeople in our Vancouver studio. We believe that by combining unique design, quality materials, and an enormous amount of embodied craftsmanship, we create work that resonates with people.

The Myco light is handcrafted from black walnut, ash or white oak. Other species of wood and custom finishes are available upon request. The Myco is lit with low voltage LED lamps and finished with a LEED compliant, non-toxic low VOC finish.
